

Quality Auditor

OPEN POSITION

Plastikos, Inc., North America's premier supplier of precision injection molded custom electronic and medical components, is looking to fill the role of Quality Auditor.

The successful candidate must be able to perform with accuracy in a fast-paced and quickly-changing environment as well as provide critical support to the Quality Department through the completion of the final visual inspection of all finished goods to ensure compliance with the customer's and Plastikos' quality specifications.

KEY RESPONSIBILITIES

- » Audits production parts from all injection molding machines for visual defects as they are being produced, as well as already packaged production parts.
- » Places any/all parts with defects on "Quality Hold". Fills out NCR (Non-Conformance Report) and notes the physical location of the parts on the DPR (Daily Production Report).
- » Verifies counts to the Open Order Report in Shipping Department. Once confirmed, moves up the next job that is scheduled in the corresponding press within IQMS.
- » Communicates all scrap issues and concerns to the Quality Team Leader and Molding Manager.
- » Processes complete orders with the appropriate documentation and labels, then takes finished boxes to the Shipping Department.
- » Follows the steps required to prepare for Start-Up of each new order.
- » Looks up print (Daily Production Report (DPR) contains part number) in database for Visual Defect Guideline
- » Conducts press audits - visual, functional, and dimensional, as needed per specified requirements.
- » Verifies part weights - when part weight is outside of scale tolerance notifies the Quality Supervisor.
- » Conducts box audits - audits in-process production (approximately 30% of box).
- » Updates DPR with production/scrap/defect information.
- » Layer Packs - completes special packaging specifications as product is produced while completing box audits.
- » Manages bucket change process (PO changes) and bucket complete process
- » Detects defects(s) and initiates Part Nonconformance Report (PNR) paperwork. Demonstrates effective defect decision making by correctly making 80%+ of all part quality decisions without additional input/assistance.
- » At Shift Change, views IQMS to review current production order status and visually inspects a shot from every press in assigned section.
- » Communicates with all team members as appropriate to ensure the highest levels of quality, efficiency, and safety are met.

QUALIFICATIONS

- » Communicates effectively with teammates
- » Works well independently (self-motivated), as well as in a team environment
- » Maintains a positive attitude and a strong individual work ethic
- » Possesses a strong attention to detail
- » Is capable of multi-tasking
- » Consistently meets deadlines
- » Reads and understands blueprints, possesses knowledge of shop math (addition, subtraction, multiplication, division, percentages, etc.), and has basic computer skills
- » Makes good decisions when problem solving and independent judgment
- » Is experienced with the use of hand-held and optical measuring equipment and understands results
- » Regards safety as a priority and maintaining a clean work environment

Comprehensive compensation package includes insurance benefits, 401k, flex plan, life insurance, and bonus program.
