

Plastikos & Micro Mold

SPRING 2013

A foundation of service, advanced engineering, quality and delivery since 1978.

Teamwork Brings Big Gains in Accuracy & Efficiency

Inside 2 Ongoing, Award-Winning Plastikos Continuous Improvement Initiatives

Cut mislabeled product to 0. Reduce raw material use by 75,000 pounds per year. Just two of the ways we've worked together to hold down costs while maximizing quality at Plastikos – and among the reasons we've earned two Manufacturing Leadership 100 Awards presented by the Frost & Sullivan Manufacturing Council.

INSIDE MICRO MOLD

Are You Investing in Quality-Driving Automation?

Think investing in new technologies is risky? Consider what happens if you *don't* invest in your future. To help meet increasing needs for higher quality and lower costs, Micro Mold believes it's essential to make ongoing strategic investments in advanced technologies. In a special presentation at Amerimold 2013 (June 12-13 in Rosemont, IL), you can learn from our example.

SPI recognizes Micro Mold and Plastikos as 2012 Safety Award winners. [Learn more about the awards](#)

CUSTOMER PERSPECTIVES

"We get excellent technical support from the Tool Room to inspect, fit and revise the molds and from the floor to hang, set up and run molds. In addition, the continued acquisition of new molding machines, eDARTs, hot runner controllers, etc. keeps expanding the opportunities."

– Jason T., Mold Process Engineer for leading electronics OEM
